Re: Client Recommendation for Edwards Engineering, Inc.

Dear Mr. Schneider:

It has been a pleasure over the past decade to be associated with Gray Edwards both during his tenure with Emcon Associates and now as Edwards Engineering.

Edwards Engineering has provided a full range of civil engineering services for B-TEX Environmental Company. This has encompassed site planning, site engineering design, drainage design, as well as water management district permitting.

Many of the projects that Edwards Engineering has completed for my company were completed under stringent deadlines. The ability of Mr. Edward's group to not only meet these deadlines, but to do so with technical accuracy and completeness has led to the success of each project.

As you are well aware, civil engineering sets the tone for any development project and I strongly recommend Edwards Engineering as a firm worthy of serving the City of Jacksonville. Mr. Edwards maintains personal involvement in each project and I know you will enjoy his project management style.

Please contact me, if you wish to inquire further about his and his company's abilities.
Sincerely,

B-TEX Environmental Company, Inc.

Donald W. Dix
President
