To Whom It May Concern:

I would like to take this opportunity to recommend Edwards Engineering, Inc. for any upcoming work. Last year, we began utilizing Edwards Engineering on several small projects and we have gradually, due to their performance, consistently sought Edwards for their civil engineering excellence.

Most notably for me personally, was Edwards work for Saxelbye on our statewide work for NationsBank. They completed fast track permitting for 15 NationsBank sites throughout the State. All permitting (either permit exception or actual permits) was completed ahead of an already tight schedule.

Feel free to contact me should you have any questions about Edwards Engineering's performance for Saxelbye Architects.

Sincerely,

Dennis R. Lane, AIA  
Vice President
